

# **Solar PV motion for the 2023 AGM**

## **Original**

The Society approves the installation of Solar PV systems in accordance with the Reference Design presented at the AGM on 1<sup>st</sup> November 2023. Any householder wishing to install such a system must first submit drawings to the Committee showing how and where the various components of the system will be placed, and must not start installation work until the Committee has approved the plans.

## **As approved**

The Society approves the installation of Solar PV systems in accordance with the Reference Design presented at the AGM on 1<sup>st</sup> November 2023. Cables must be routed down the back of the house wherever possible, to minimise the visual impact. Any householder wishing to install such a system must first submit drawings to the Committee showing how and where the various components of the system will be placed. The plans will be circulated to all residents for comment. Installation work must not start until the Committee has approved the plans.
